

# *tutorial* Linings & Coated Fabrics

We have several options to choose from

All linings are supplied in the colour off white.

1. Poly Cotton (separate lining sewn in)
2. Microlene (separate lining sewn in)
3. Thermal (separate lining sewn in)
4. Thermal Coating (applied to the back of the fabric)
5. Blackout (separate lining sewn in)
6. Blackout Coating (applied to the back of the fabric)

**Tip:** hold the cursor over each lining type for a detailed description of its composition

When ordering **Roman Blinds** you can select a separate lining or a coated fabric if purchasing the plain or striped fabrics from the website.

If you are **providing your own fabric** with out lining select the type of lining you would like to have. Please select a separate lining **only**. If the fabric you're supplying has a coating select the "No Lining" option.

If you are providing your own lining with your fabric please also select the "No Lining" option.

If you are requesting a quote to have your Roman Blinds made in an **alternative fabric of your choice** select a separate lining also, unless the fabric comes already coated, if the fabric is coated select the "No Lining" option.

Please note we **can not** coat your fabric, you either need to purchase a fabric already coated from the website or a local fabric store.
